-

Experience

Accenture — *Platform Engineering Developer / Manager*

March 2020 – Present | Seattle, WA & Boston, MA

www.accenture.com

- Lead multiple client workstreams, managing both net new development and the maintenance/retention of legacy platforms, ensuring seamless operations for Fortune 500 clients.
- Spearheaded over 500 code commits, significantly enhancing system features, improving user experience, and maintaining regulatory compliance across large-scale applications.
- Contributed to the development of data pipelines using Python, enabling efficient data processing and real-time reporting for clients.
- Facilitated upskilling sessions for engineering teams, resulting in a 20% improvement in knowledge retention and faster ramp-up for new technologies.
- Worked directly with sales teams to design Proof of Concept applications, helping secure new business and expand the client portfolio by 15%.

EF Education First — *Marketing Technologist*

April 2014 – July 2019 | Boston, MA

www.eftours.com

- Managed a \$100,000+ annual digital marketing budget, optimizing ad spending across social media and paid search channels to increase lead generation by 30%.
- Led monthly executive presentations on marketing KPIs, providing actionable insights and recommendations that drove a 25% increase in ad conversion rates.
- Developed and maintained landing pages and lead capture forms, streamlining the conversion funnel and improving lead capture efficiency by 20%.
- Collaborated with cross-functional teams to integrate marketing strategies with sales, resulting in a 10% growth in business closures.

Education

General Assembly — *Software Engineering Fellowship*

January 2020 – April 2020

- Completed a 12-week, 500+ hour immersive program, mastering full-stack web development through hands-on projects and mentorship.
- Developed multiple web applications under tight deadlines, gaining experience with MERN stack (MongoDB, Express, React, Node.js) and Ruby on Rails.

University of New England — *B.S. Business Administration & B.A. Communications*

September 2010 – May 2014

Projects

Survivor Fantasy League — *MERN Stack Web App*

[Link](#)

- Developed a fully-functional fantasy league app based on the TV show *Survivor*, using the MERN stack.
- Implemented JWT authentication and email-based password recovery for secure user management.
- **Technologies:** React, Node.js, Express, MongoDB

DadJokes.IO — *API Integration & Mobile Ergonomics*

[Link](#)

- Integrated the ICanHazDadJoke API to provide users with random dad jokes, enhancing the user experience through transition animations and mobile-first design.
- **Technologies:** React, JavaScript, HTML, CSS

An Adventure Awaits! — *Gamified Portfolio*

[Link](#)

- Developed a 2D game portfolio to explore interest in game development, learning JavaScript game mechanics and basic animation.
- **Technologies:** JavaScript, KABOOM.js

TR.I.P.S — *Full-Stack CRUD App*

[Link](#)

- Built a full-stack CRUD application to manage trip data using the MERN stack and Passport.js for authentication.
- **Technologies:** React, Node.js, Express, MongoDB, Passport.js

Certifications & Additional Training

- **AWS Certified Developer – Associate** (In Progress)
 - **Certified ScrumMaster® (CSM)** (In Progress)
 - **React JS: From Beginner to Pro** — Udemy (Completed)
